w Summary, PTO-413	
of Informal Patent Application, PTO-15	
or informal Patent Application, P10-15	
)	

Application/Control Number: 10/020,627

Art Unit: 1617

Claims 9-37 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a crosslinked IPN wherein one accymer is a polyhydroxy alkyl acrylate and the spacer is a poly(hydroxycarboxylic acid), does not reasonably provide enablement for any hydrolysable spacer and any two polymers. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to making the invention commensurate in scope with these claims. On page 8 line to-page 9 line 23 applicants disclose a hydroxyalkyl acrylate terminated spacer of poly (hydroxy carboxylic acid) pre polymer bound to a first polymer (dextran) followed by polymerization of the acrylate to make the second polymer. The making of no other second polymer and no other hydrolysable spacer is described.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9-37 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 13-31 of copending Application No. 09/214,306. Although the conflicting claims are not identical,

Application/Control Number: 10/020,627

Art Unit: 1617

they are not patentably distinct from each other because the instant claims encompass

Page 3

those of '306.

This is a provisional obviousness-type double patenting rejection because the

conflicting claims have not in fact been patented.

No claims allowed.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Edward Webman whose telephone number is (703)

308-4432. The examiner can normally be reached on Monday to Friday 9 Am 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Minna Moezie can be reached on (703) 308-0570. The fax phone numbers

for the organization where this application or proceeding is assigned are (703) 305-3592

for regular communications and (703) 305-3592 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

1235.
